MEMORANDUM FOR: Acting Deputy Director (Support)

25X1A9a

ATTENTION:

Mr. [REDACTED]

25X1X4

SUBJECT: Memorandum of 7 September 1956 from Director of
Communications [REDACTED]

25X1A

25X1X4

25X1A9a

25X1A9a

1. I presume [REDACTED] is of course talking about the [REDACTED] I have, in accordance with instructions from Col. White, held meetings with his representative Mr. [REDACTED] as well as representatives from the Office of Logistics and Comptroller's Office. Actually Mr. [REDACTED] has not only been kept advised by this office so that Commo would have all the information available in order to proceed with their planning but he also is in close touch with the FI Staff, Air Maritime Staff and Office of Logistics, and in my opinion has been more fully informed of this embryonic program to date than any other DD/S representative. I had a number of separate meetings and one joint meeting. SSA(Log) is a focal point on this Staff for keeping our finger on this particular project.

2. The Office of Communications, Office of Logistics, and Comptroller's Office (Budget) have need to know of any changes in this project as soon as such changes are initiated and/or agreed upon. This information we are receiving from Air Maritime Division will be forwarded to the appropriate representatives in the above three offices as soon as we are aware of the same.

25X1A9a

3. As regards [REDACTED] last paragraph, the present plan is that there will be two main bases in two widely separated areas of the world. It is also true, however, that with each main base it is planned to have in addition at least one staging base and that [REDACTED] kits which might be required for repair work away from the main base would be adequately equipped. The key representatives of the Logistics Office, Commo Office and Comptroller's Office have been advised that they will be kept fully informed by C/AMD/PP who is the Headquarters

case officer for this project. Of course it is anticipated that the representatives of these offices will, as a part of their own responsibility, keep in constant touch with C/AMD and convey any problem which they may have to him. If they do not obtain satisfaction this Staff is constantly ready to assist.

Special Support Assistant
